

### **How to use**

It's so simple to use. You wash your décollette with a non moisturising soap and water, peel the protective backing off the pad, place it on your dried off chest, and leave it there overnight, giving new meaning to the term "beauty sleep!"

Alternatively, you can wear it underneath your clothes during the day. From time to time the pad must be washed with (non moisturising) soap and rinse with warm water, then left to air dry.

The plastic backing should be reapplied after each use to maximize the pad's longevity, protect the integrity of the silicone.

To prolong the life of your pad even more, you can wipe it with witch hazel. If you're in a hurry and forgot to apply your pad the night before, you can apply it for as little as half an hour to soften the lines and give the skin a wonderfully soft texture, before slipping into your revealing top or dress for that special occasion.
